

DAOPHOT, DAOSPEC and related software (c)
Copyright 2007 by the National Research Council of Canada

DAOPHOT and related software packages, which were developed by Peter B. Stetson, are subject to Crown Copyrights that are the intellectual property of the National Research Council of Canada. This software is being provided free of charge to interested scientific researchers with the sole condition that the recipients agree not to distribute either original or modified copies of this software to other individuals or organizations without the express written permission of the National Research Council of Canada. All requests for copies of this software, and for permission for further distribution, should be directed to Peter B. Stetson at the address below.

This restriction is intended (1) to prevent multiple, variously modified versions of the software from circulating in the scientific community under a single name, thereby causing much confusion; (2) to ensure direct communication between all users of the software and its primary developer, so that any problems may be immediately addressed; and (3) to assist in the appropriate attribution of credit and blame.

By signing and returning this statement, you agree that neither you nor your organization will distribute either original or modified copies of this software without the permission of the National Research Council of Canada.

Greg Fahlman, Director General
Herzberg Institute of Astrophysics
National Research Council of Canada
